

Confirmation of Negative Lateral Flow Test for Covid-19.

As per Motorsport UK Covid guidelines, we require evidence of a negative lateral flow test taken within three days of the rally as a condition of entry.

Lateral Flow tests are for asymptomatic individuals. If you have symptoms, you should not attend Machrihanish and seek a PCR test and if necessary, seek separate medical advice.

The Scottish government have been encouraging us to take regular lateral flow tests anyway, and/or you may have been doing so in relation to your work. If, however, you have not been testing you can register and acquire test kits via the following:

<https://www.gov.uk/order-coronavirus-rapid-lateral-flow-tests>

Once you have taken your test, the next step is to report / record the result. This is done using this website:

<https://www.gov.uk/report-covid19-result>

If negative you will receive an e mail confirming this which you can then upload to us, via the online entry system, ahead of the event. If positive it should still be reported using this link, but you must then self isolate and not attend the rally. NHS track and trace will then contact you.
